

Notes for My Paper. This is an updated version for the 19th May 2021

Don't forget to include examples of topicalization. They look like this:

- (1) Topicalization from sentential subject:
a John_i [a kltukl [el l-oltoir er ngii_i a Mary]]
R-clear COMP IR.3S-love P him
John, (it's) clear that Mary loves (him).

How to handle topicalization - Git Tutorial V1

I'll just assume a tree structure like (2). Tree changes

- (2) Structure of A' Projections:

Mood changes when there is a topic, as well as when there is WH-movement. *Irrealis* is the mood when there is a non-subject topic or WH-phrase in Comp. *Realis* is the mood when there is a subject topic or WH-phrase.
